Pansilu Buddhadasa – M01007521 – Personal Log

Date	What I / We did	Thoughts
01/20/2026	Assigned as Team Secretary	First, I checked what I should do as team secretary, because it's a new role for me
01/21/2026	Connecting all the members together	As we were in separate classes and some new friends, I had to connect them together with the team leader
01/25/2026	Conducted our first meeting together to discuss about the project	Even though we don't know what's the project gonna be we shared our skills and what we can do by our sides.
01/27/2026	"Gym Membership" we got our project	As I love GYM this is a good topic to work on
01/27/2026	Asking everyone to look what we can do for this project, bring ideas to the table	We didn't first talk what we gonna do so that everyone can come with a different idea and new ideas .
02/12/2026	All done and came up with some good use cases , our first discord meeting that last almost two hours	Got some good and crazy ideas to work on and I was so tired as I joined the online meeting right after my work shift
02/12/2026	I got assigned user requirements to work on	As I am the secretary I must work on writing this
02/20/2026	I handed over the user requirements I did but there was some missing, so leader helped me out	I tried my best, but got some missing info so he joined
02/25/2026	Lab 6 exam, so I was studying for this almost every time past few days	Got 9/10 so yeah I am happy
02/27/2026	Got the finalized user requirements and started thinking about how to get them done in the project	Should make sure they are actually working and if it really needed

02/28/2026	Didn’t work for like four days as I went to a MDX tournament	Have to balance everything
03/03/2026	First hands in desiging , fixing my whiteboards and tools like Figma	This is my favourite side
03/04/2026	I was searching and researching the current world gym apps and websites to get the best for our design, this took like 3-4 days	When I start searching, I saw so many stuff that i should think about when it comes to designing
03/07/2026	Our first physical meeting at the library besides Discord calls , I will attach pictures down Me,Jay and Sam was here	Made into a physical meeting hurayyy
03/10/2026	Came up with some Figma designs	Showed what I researched and found for our project , team was quite happy with my design for members
03/10/2026	Our second physical meeting in Library with the whole group	Here I got setup my other windows laptop as I couldn’t code on MAC using Visual studio communities
03/11/2026	Start coding to make the front end for members as we finalized our color pallets and other elements and start putting hand on learning what .ASP NET means	Start learning and failing from here to the next four weeks
03/12/2026	Gave up working with windows and moved back to MAC	I start coding on VS code , because going back to windows is so hard and it’s slow compared to other laptop
03/23/2026	Almost done with the front end design for members with almost 9 to 10 linked pages , but still I am coding as HTML , CSS , Js	Was okay and not too hard

03/25/2026	Made my first commit to GitHub as this is my first time	Because I moved all the code that I was building alone in a different folder to the project folder DeltaGymSystem
03/26/2026	Start changing HTML into .cshtml and css into related links , took almost 4-5 days	Here comes the problems , this took so much time than I thought
03/30/2026	Had to move my files according to the MVC format, members and non members	Problems problems problems but I was learning
03/31/2026	Hands on connecting front end to backend	This is the hardest part if I am not wrong for me throught the project
05/04/2026	Register , login and MyProfile got connected with the backend	I almost die connecting these , got the help from leader to learn and fix my errors
07/04/2026	Last physical meeting at the library to get ready for the presentation	As the leader got Covid I took the responsibility my team do the presentation well, so I had to assign each part by talking with my team members .
08/04/2026	Presentation day	We think we did almost our best here as we got 10 minutes to cover all the three sectors Members,Trainers, and Managament
09/04/2026	Got an email saying the due date is changed to 19/04/2026	So we have enough time to work on the report so everyone was calm and cool
15/04/2026	I changed my Figma whiteboard to a new one as I got all my old and trash designs there in my previous white board and also I am done with writing	Almost done with the project now , we just have to submit the project now

	the report for the front end design and implementation	

On top of these I tried my best to connect the team members towards the project to make them sure they are working, below I will attach pictures of our physical meetings, online meetings that I got with me
